

**PLASTI DIP - Dip "It's like Duct Tape in a can!" - America's No.1 Flexible Rubber Coating**

PLASTI DIP is an air dry, synthetic rubber coating that can easily be applied by spraying, brushing or dipping. PLASTI DIP resists moisture, acids, abrasion, weathering, electric shock, skidding/slipping and corrosion. PLASTI DIP won't **peel, chip or crack!** It can be used in D.I.Y, electrical, marine and industrial applications and harsh environments to seal out moisture and weatherproof most surfaces including metal, wood, concrete, rubber and plastics.

**PLASTI DIP - Spray On "The dip - in an Aerosol!"**

Offers the effectiveness of PLASTI DIP and the convenience of a spray can. Ideal for refinishing outdoor furniture, gas bottles, hard to reach places and pre-assembled complex equipment, that needs protection from the elements including, boat instrument panels, control panels and electronic components in the agricultural and mining environment.

**LIQUID ELECTRICAL TAPE - America's No.1 Dielectrical Coating**

LIQUID ELECTRICAL TAPE is an air dry, synthetic rubber coating that can be brushed on and exhibits excellent moisture, acid, alkaline, abrasion and dielectric resistance. LIQUID TAPE can be used in manufacturing to insulate, protect and color code connections. It remains flexible even under extreme conditions and wont crack, harden or peel. LIQUID ELECTRICAL TAPE has a dielectric rating and is ideal for insulating D.C connections, PCB boards, battery terminals switches, solenoids or any component part that need electrical insulation and protection from the elements. Protects against battery acid, salt water and is U.V protected.

**SUPER GRIP - America's No.1 Non Skid Rubberized Coating**

SUPER GRIP is an air dry, non yellowing, synthetic rubber coating that bonds to most types of fabrics to prevent skidding and slipping on slick surfaces, is washable, remains flexible and will not transfer from applied surface to any other surface. SUPER GRIP is a non skid coating that is applied to the back of rugs, mats or panels and prevents them from skidding when in place. SUPER GRIP forms a soft pliable rubber film on the surface that completely eliminates skidding. Ideal for rugs, bath mats, vehicle floor mats and much more.

**VYNA BOND - America's No.1 Vinyl repair patch**

VYNA BOND is a transparent patch repair system, complete with clear patching material in the pack. VYNA BOND is a strong, flexible vinyl contact adhesive, can be brushed or spread, is fast drying and has excellent resistance to softening from plasticizer migration. VYNA BOND will repair swimming pool liners - even under water, ideal for camping and marine use.

### VLP - America's No.1 Vinyl repair product

VLP is a clear, high strength, flexible adhesive, designed to mend rips, tears and small holes on most types of flexible vinyl surfaces. VLP is supplied in an easy to use air dry formula that dries clear and blends with with all colored vinyl's. VLP actually dissolves the surface of the vinyl and creates an excellent bond when completely dry. On porous fabrics, VLP can be used the same as on vinyl but actually penetrates the pores and creates an excellent mechanical bond. VLP fuses the vinyl together to form a tough, waterproof repair that last for years. It will repair dishwasher racks, car seats, dashboards, pool toys, and camping gear.

### PLASTISEAM - No.1 in Waterproofing, sealing, restoring and repairing seams on all fabrics.

PLASTISEAM is a tough, clear, flexible resin system that is excellent for sealing out moisture in pinholes in sewn seams. PLASTISEAM is second to none in performance and will last far longer than any other seam sealer on the market. PLASTISEAM comes in a convenient roll-on applicator bottle and waterproofs stitching in cloth, canvas, vinyl, plastic etc. The applicator forces the transparent PLASTISEAM into stitching joints and it dries clear, tough and waterproof. Ideal for hiking boots, tents, tarpaulin covers, annexes or anywhere a waterproof cover is required.

### RUST STOPPER - Coats right over rust - no primer required - this Rust Stopper WORKS!

RUST STOPPER forms an airtight seal over metals that moisture and harmful chemicals cannot penetrate. RUST STOPPER will not crack, chip, or peel, is weather resistant and will last for years. Water based for easy clean-up RUST STOPPER works by completely encapsulating the rusty surface and seals out moisture, air and harmful chemicals, stopping the oxidization process dead. Ideal for marine applications because there is no need for primer. Just scrape off and paint on.

### HCF - Multi-Purpose Acrylic Coating

HCF is a flexible acrylic, water base coating. It's very low V.O.C's, non-flammable and high solid content make it an Emission Control Coating System, ECCS, that can be air-dried or heat cured to meet production demands. HCF can be sprayed, dipped or brushed, is available in a wide variety of colors, and exhibits excellent petroleum, chemical, UV, corrosion and abrasion resistance. The safety of water base with the performance of solvent based coatings.

### PLASTI DIP THINNERS - Use with Plasti Dip Multi-Purpose Rubber Coating

PLASTI DIP THINNERS was formulated specifically for use with PLASTI DIP where a thinner application is desired.

### PLASTI DIP PRIMER - Use with Plasti Dip Multi-Purpose Rubber Coating

PLASTI DIP PRIMER is an air dry, acrylic primer specifically developed to increase adhesion of PLASTI DIP to metals up to 400%. PRIMER can be sprayed, dipped or brushed and offers fast set up time with a high coverage rate. Typically applied in one coat, only extreme corrosion and abrasion require a second or third coat, eliminating extensive preparation for most applications.
